- **Databases :** PostgreSQL, MySQL

- **ORM / Database Tools :** Drizzle ORM

- **Developer Tools :** VS Code, IntelliJ IDEA, Postman, Visual Studio, Git

Projects

Krishna-Travels
https://github.com/kashyap1710/Antique-Article — Dec 2024 – Apr 2026
`[React.js, Node.js, Express.js, PostgreSQL, Tailwind CSS]`

- Developed a full-stack Sleeper Bus Booking System featuring interactive seat selection, automated booking confirmations, and a sell-out risk prediction algorithm.

- Implemented backend data handling operations using PostgreSQL and Drizzle ORM with type-safe queries.

Jobify
https://github.com/kashyap1710/Jobify — Dec 2024 – Apr 2026
`[React.js, Java, Spring Boot, MySQL]`

- Jobify is a full-stack web application designed to help users explore job listings, submit applications, and manage their application status.

- The platform features user interface that enables browsing by job categories, applying filters, and submitting job applications with ease. It also includes a back-end system for handling user profiles, job data.

Achievements / Certification

- **AWS Certification** : AWS Academy Graduate – AWS Academy Cloud Foundations.

- **DUHacks 3.0** : A web app that streamlines finding and managing pay-and-guest houses for owners listing accommodations and students seeking a place to stay.

- Served as House Wise-Captain for one year, successfully leading the team to win the "House of the Year" trophy.
